SUMMARY	I am a junior fullstack developer who has nearly 2 years experience. Skilled in building web based application and know the technique about identifying database, fundamental programming, version control system, and API management along with API documentation and API testing. Have experience in building website with React and Laravel and also Wordpress.	
EXPERIENCE	Alan Creative	Depok, ID
	<i>Web Developer</i>	<i>Onsite</i>
	- In here the website making are categorized as two which is fully customized website and Wordpress based website. - In fully customized website, the tech stack is React.js with Redux including Reducer and Selector, and React Router for Frontend and PHP with Laravel as Backend. The website that I had been making is admin dashboard related to CRUD, import export, mailer, and Socket.io. - In Wordpress based website, the website that I had been making is company profile, portfolio, landing page, and e-commerce. The plugin I had been using to make all that website is Elementor, WooCommerce, and other supported plugin.	Feb 2024 – Present
	Suitmedia Digital Agency	Palembang, ID
	<i>Software Engineer Intern</i>	<i>Online</i>
	- This is an internship program from Suitmedia that I got from Kampus Merdeka program. I got this program on the third batch and I choose Software Engineer intern for 5 months from August 2022 to December 2022 - The internship program is conducted on a project basis using real projects. On the project I handled bug fixes, modified existing small features, and created new small to medium scale features. In addition, the project implemented daily scrum which made the progress of the project easy to monitor.	Aug 2022 – Dec 2022
