## Education

**Xavier Institute of Engineering**

**Dec. 2021 – May 2025**

*Bachelor of Engineering in Information Technology - CGPA: 8.9*

*Mumbai, India*

## Experience

**Web Developer** | *Ansari Corporate Advisors, Delhi*

**Jan 2024 – Present**

- Developed a **comprehensive enterprise web application** with advanced scheduling and collaboration features, supporting up to **100 participants** and **1,000 simultaneous users**.
- Implemented **robust authentication system** and seamless integration with **Microsoft ecosystem** including Todo, Calendar, and Outlook using **Microsoft Graph API**.
- Engineered **performance-critical features** including **real-time chat**, **meeting scheduling**, **event management**, and **automated reporting** with **30%** reduction in page load times.
- Designed complex **dashboard** and **reporting mechanisms**, including **WhatsApp** messaging and **PDF archival** for comprehensive meeting documentation.
- Engineered **modular enterprise solutions** across multiple domains, including **IP Address Management**, **Department Workflow**, and **Employee Contract Tracking** with advanced features like **dynamic filtering**, **access control**, and **automated notification systems**.

## Projects

**QuickStay - Cabin Booking Platform** | *Next.js, Tailwind CSS, Supabase, Google Auth* | 🔗

**Mar 2024**

- Engineered a **full-stack booking application** with **15+ features** including **user authentication**, **dynamic pricing**, and **responsive design**.
- Implemented **Google Authentication** via next-auth, reducing sign-up friction by **40%** while automatically creating user profiles in the database.
- Built **user dashboard** for managing reservations with **CRUD operations**, enabling customers to view, edit, and cancel upcoming bookings.
- Developed a **comprehensive reservation system** with date-range selection that dynamically calculates pricing based on **3 cabin categories** and applicable discounts.
- Integrated **Supabase** for database management and implemented **REST Countries API** to enhance user profile functionality with nationality selection.

**Neo AI App** | *Flutter, Dart, Firebase, API Handling* | 🔗

**July 2023**

- Engineered **Neo AI App** with **5 AI-powered features**, including **chatbot**, **code generation**, **image generation**, **language translation**, and **transcript generation**.
- Integrated **OpenAI APIs** such as **GPT-3.5** for chatbots and **Whisper Model** for transcription, reducing processing time by **80%**.
- Utilized **Firebase** for Google login, **Cloud Firestore** for secure data storage, and **Stripe API** for seamless in-app payments.
- Integrated **DALL-E Model API** for generating high-quality **images** from natural language prompts.
- Optimized **API request handling** with **caching mechanisms** and **local storage integration**, reducing app loading times by **40%** and decreasing API usage costs by **25%**.

## Technical Skills

**Languages:** Java, JavaScript, HTML/CSS, SQL, C#, Dart, Python

**Technologies/Frameworks:** React, Next.js, Node.js, Express.js, Flutter, Tailwind CSS, Bootstrap, Firebase, Supabase, ASP.NET Web Forms

**Developer Tools:** VS Code, Android Studio, IntelliJ IDEA, PyCharm, SQL Server Management Studio (SSMS), Git, GitHub, Linux

## Coding Profiles

- Leetcode** (Solved **300+** questions) | 🔗
- GeeksforGeeks** (Solved **120+** questions) | 🔗
- Hackerrank** (Java **5 ★**, Data Structure & Algorithms **5 ★**) | 🔗
