PROFESSIONAL SUMMARY

A highly curious and detail-oriented professional with a strong passion for testing, automation, and monitoring of web applications. Possesses a solid foundation in building automation frameworks, API testing, and software monitoring, with a growing interest in performance testing. Enjoys building test automation frameworks and enhancing system reliability. Proficient in CI/CD tools like Jenkins and well-versed in MySQL, working knowledge of MongoDB and PostgreSQL. Dedicated to ensuring quality and efficiency throughout the development lifecycle, while continuously learning and refining skills to contribute effectively to software excellence.

SKILLS

Technical Skills

- Testing & Automation
 - Manual and Automation (Web UI, API, Android/iOS)
 - Test Automation Frameworks(Selenium, Appium, Pytest, Cypress)
- Scripting & Development
 - Programming - Javascript, Java, Python, Bash, Powershell
 - API Testing and Automation (Postman, Newman, Rest Assured)
- Monitoring
 - Prometheus, Grafana
- CI/CD & DevOps
 - Jenkins,
 - Docker, Kubernetes - Basic
- Database
 - SQL (Queries, Triggers - Basic, Stored Procedures - Basic)
 - NoSQL (MongoDB)
- Version Control & Tool
 - Git, Github,
 - JIRA, Confluence, Bugasura

Soft Skills

- Problem-Solving & Analytical Thinking
 - Strong ability to debug, analyze logs, and identify system issues.
- Attention to Detail
 - Ensures quality by focusing on every aspect of automation, monitoring, and performance.
- Adaptability & Continuous Learning
 - Passionate about exploring new tools and improving testing frameworks.
- Collaboration & Teamwork
 - Works effectively with developers, DevOps, and product teams to enhance software quality.
- Time Management & Prioritization
 - Efficiently handles multiple testing and automation tasks in a fast-paced environment.

EXPERIENCE

Vantage Circle, Guwahati Assam - QA Engineer I

June 2024 - PRESENT

- Designed and maintained comprehensive test cases and documentation to ensure full test coverage and traceability.
- Conducted User Acceptance Testing (UAT) for high-profile clients, ensuring software solutions met business requirements before deployment.
- Partnered with key clients, including Blackbox, HDFC Ergo, Zuventus Healthcare, Bangalore Airport, Engage2Excel, LPL Financials, Tata Motors, Tata Technologies, and Wipro, addressing their needs and resolving issues effectively.
- Developed and executed automated test scripts using Selenium (Java & JavaScript), Python (Pytest), and Cypress, improving efficiency and reliability in testing processes.
- Performed in-depth database validation using MySQL, ensuring data integrity and consistency across applications.
- Worked closely with cross-functional teams to identify root causes of issues, improving product quality and reducing defect leakage.
- Utilized monitoring tools like Grafana and Prometheus to track system performance and identify potential issues proactively.
- Managed CI/CD pipelines with Jenkins, ensuring seamless integration and deployment of automated tests.

-
- Maintained version control using Git, ensuring effective collaboration and streamlined code management.
 - Conducted functional, regression, and system testing, validating software behavior under different conditions and use cases.
 - Applied critical thinking and problem-solving skills to debug complex issues, enhancing the overall testing process and software quality.

Vantage Circle, Guwahati Assam - *Test Engineer*

November 2022 - June 2024

- Conducted UAT and End-to-End testing for clients including L&T Technology Services Limited, Inmobi, Bluestar India Ltd, Black Box, HTC Inc, Infogain, Bristlecone, Hyundai Capital Canada, Firstsource, LPL Financial, and others.
- Designed comprehensive test plans, test cases, and test execution strategies, ensuring alignment with product requirements and client expectations.
- Executed manual and automated tests across multiple platforms and devices, utilizing tools such as BrowserStack, LambdaTest, and Zephyr Squad.
- Validated software quality at various stages of development, including component, API, feature, and end-to-end testing.
- Performed cross-browser and cross-device testing across multiple operating systems.
- Collaborated with development, product, and customer support teams to streamline defect resolution and optimize product quality.
- Coordinated closely with developers to report, track, and analyze defects, providing actionable insights to enhance software reliability.
- Utilized JIRA for test management, defect tracking, and progress monitoring.
- Analyzed application logs, generated detailed test reports, and produced escaped defect tracking reports to improve testing effectiveness.
- Contributed to the enhancement of test strategies by implementing best practices for test case design, execution, and defect management.

Vantage Circle, Guwahati Assam - *Test Engineer Intern*

July 2022 - OCT 2022

- Gained hands-on experience in various testing types, including Functional, UI/UX, Acceptance, Blackbox, Regression, Integration, and End-to-End testing.

-
- Utilized MySQL to validate front-end data against the database.
 - Developed an understanding of requirement gathering and test planning.
 - Conducted testing on an Employee Engagement Product with redemption features.
 - Became familiar with SDLC processes and Agile methodologies.
 - Enhanced expertise in Non-functional Testing, Manual Testing, and additional QA-related skills.

EDUCATION

The Assam Kaziranga University, Jorhat - *Bachelor of Technology, Computer Science and Engineering*

August 2018 - May 2022

Specialization: Cloud Computing and Virtualization By IBM
