---

## Professional Summary

Results-driven **Business Intelligence Analyst** with experience in **remote data analytics**, automation, and dashboard development. Skilled in Python, SQL (Presto & MySQL), and visualization tools like Power BI. Proven track record supporting cross-functional teams in **Digital Marketing, Content, and Supply Chain** analytics. Adept at crafting scalable data solutions that empower business decisions. Fluent in English and Bahasa Indonesia. Open to fully remote roles globally.

---

## Professional Experience

### Shopee (Hybrid)

*Business Intelligence Analyst – Social Features*

**Nov 2023 – Jun 2025**

- Managed big data pipelines using **Presto SQL**, reducing manual reporting time by 50%.
- Developed internal **automation tools** that supported asynchronous workflows.
- Built actionable reports using Google Sheets and Google Data Studio for cross-border teams.
- Advised stakeholders across Indonesia with strategic insights from content analytics.
- Led deep-dive investigations into social product KPIs to uncover bottlenecks and user behaviour patterns.

### Philip Morris International (Hybrid)

*Data Analyst – Supply Chain*

**Feb 2023 – Jun 2023**

- Automated monthly reporting using **Python scripts**, saving over 10 hours/week.
- Designed and maintained dashboards in **Excel** and **Power BI** to visualize logistics data.
- Coordinated with internal and external stakeholders to manage shared data repositories via **SharePoint**.
- Contributed to team workshops and internal events to improve cross-departmental cohesion.

### Google Bangkit Academy (Remote)

*Engineer – Machine Learning*

**Feb 2021 – Jul 2021**

- Created an NLP model with **TensorFlow** for text classification with 99% accuracy.
- Oversaw remote development of a capstone web app launched before deadline.
- Built and deployed ETL pipelines for model input processing and visualization.
- Led a 4-person team in an agile, remote-first workflow.

## **PT. Dumas Tanjung Perak Shipyards**

*Engineering Intern*

**Feb 2021 – Mar 2021**

- Supported project coordination between clients and naval engineers.
- Analyzed hull damage using Maxsurf and tracked repair status in **Excel**.
- Ensured project delivery on schedule and in compliance with international standards.

---

## **Education**

### **Sepuluh Nopember Institute of Technology (ITS)**

*Bachelor of Engineering (B.Eng.), Naval Architecture*

**2018 – 2022** | GPA: 3.47 / 4.00

---

## **Certifications**

- **Google Business Intelligence** – Coursera (2024)
- **Data Analysis with Python** – FreeCodeCamp (2023)
- **Scientific Computing with Python** – FreeCodeCamp (2023)
- **Back-End Development & APIs** – FreeCodeCamp (2023)
- **Google Advanced Analytics** – Google Analytics Academy (2022)
- **Automation with Python** – Coursera (2021)
- **TensorFlow Developer** – Coursera (2021)

---

## **Technical Skills**

- **Programming & Analytics:** Python, Presto SQL, MySQL, Pandas, NumPy, Scikit-Learn, TensorFlow
  - **Visualization & Reporting:** Power BI, Excel, Google Data Studio, Google Sheets
  - **Cloud & Big Data:** GCP, AWS Sagemaker
  - **Web & Automation:** JavaScript, React, GitHub, APIs, Automation Tools
  - **NLP & ML:** NLP, Deep Learning, Computer Vision
-

## **Soft Skills**

- Communication | Collaboration | Adaptability | Analytical Thinking | Remote Teamwork
- 

## **Languages**

- Bahasa Indonesia (Native)
- English (Fluent)
