Summary

Recent Computer Engineering graduate with experience in JavaScript and C#. Passionate about learning and applying new technologies, with hands-on experience in .NET and SQL through personal and academic projects. Eager to develop user-friendly applications and continuously enhance my skills through practical experience.

Skills

JavaScript, Java, C#, .NET Core, SQL, Git, MS Excel

Work Experience

Software Developer Intern | Kodfu   September 2023 | Ankara, Turkey
- Analyzed complex problems and applied efficient data structures to optimize solutions.
- Worked on a web project that allows managers and employees to recognize and track their duties.
- Developed a web application using .NET Core, Blazor, and Entity Framework.

Education

Vilnius Gediminas Technical University   September 2021 - February 2022 | Vilnius, Lithuania
- Computer Science
- Erasmus+ Programme

Suleyman Demirel University   September 2018 - October 2023 | Isparta, Turkey
- Computer Engineering
- Bachelor Programme

Projects

E-Commerce Site Clone   github.com/arasateser/Store-Application
- Developed a full-stack e-commerce site clone with an admin panel for managing products, CRUD, search, and filtering.
- Motivated by well-known e-commerce websites.
- Features like admin panel, product cart, search, filtering capabilities.
.NET Core, C#, JavaScript, HTML, CSS, SQLite, Git

TikTok Ad Filter Extension   github.com/arasateser/Tiktok-Filter-Extension
- Created a web extension that automates ad filtering, streamlining for marketers by identifying and removing unwanted ads.
- Uploads, filters, and removes unwanted ads automatically to improve the efficiency of the analysis process.
JavaScript, HTML, CSS, Git

arasateser.github.io *(In progress)*   github.com/arasateser/arasateser.github.io
- Web-based platform featuring multiple interactive mini-games.
- Designed for engaging gameplay with simple and responsive UI.
- Utilizes DOM manipulation, event handling for real-time feedback, and data storage.
React, Node.js, Express.js, MongoDB

Coding Principles with Examples   github.com/arasateser/Coding-Principles
- Created a comprehensive repository explaining key software design principles.
- SOLID, DRY, KISS, YAGNI, LoD, COI with real-world examples.
C#
