PROJECTS

Interactive Wikipedia Search Application

Technologies Used: HTML, CSS, JavaScript, and Bootstrap.
Implementation: Integrated the Wikipedia API to fetch search results based on user input. Implemented dynamic rendering of results with clickable links to full articles. Added a loading spinner to enhance user experience during data retrieval. Used Bootstrap to create a responsive and intuitive user interface.

Gemini AI Clone

Technologies Used: React.js, React Hooks
Implementation: Created a Chat Context to manage and share the message array across components. User input is added to the array and sent to the Gemini AI module, and the AI response is appended to the same array, updating the chat in real time. React Hooks are used for efficient state management and seamless UI re-rendering.
