PROFILESUMMARY

Skilled professional with expertise in Java backend development, adept at building robust systems and web applications. Eager to leverage my solid foundation and practical experience to excel in a dynamic and challenging environment. Committed to continuous learning and growth to drive in novation and deliver exceptional results.

EDUCATION

B.Tech (2021-2024)
MALLABHUM INSTITUTE OF TECHNOLOGY

Diploma(2017-2020)
MURARAI GOVERNMENT POLYTECHNIC

TRAINING AND EXPERIENCE

JAVA Backend Development Internship
Cognifiz Technologies

February 20, 2025 - Present

- Solved complex technical problems related to backend development and software architecture.
- Worked with Java and Spring Boot to build and enhance backend services.
- Collaborated with the team to optimize database queries and improve application performance.
- Assisted in debugging, testing, and ensuring the scalability of solutions for production environments.

JAVA Backend Development Internship
Anudip Foundation

February 2024 - April 2024

- Learned core Java, advance Java, JSP, JDBC, Hibernate, Spring Boot basics, Maven and MySQL.
- Practiced numerous coding questions to strengthen problem-solving skills and deepen understanding of Java.

JAVA Full Stack Development Training
Pankaj Sir Academy

July 11, 2023 - February 18, 2024

- Trained in Core Java (OOPs, Collections, Multithreading) and Advanced Java (JSP, Servlets, JDBC).
- Developed RESTful APIs using Spring Boot and integrated Hibernate ORM with MySQL database.
- Built full-stack applications using HTML, CSS, JavaScript (basic), and Java backend technologies.
- Completed real-world projects demonstrating scalable backend and web application development.

TECH SKILLS

Language	Framework	Tools
Java	SpringBoot	Eclipse
SQL	Hibernate	IntelleJ IDEA
C		Vs Code
HTML		Git & GitHub
CSS		

PROJECT

Blog Application   **GitHub Link**

February 2024 - April 2024

- - Developed backend using Core Java and Spring Boot framework.
- - Created REST API for communication between frontend and backend.
- - Utilized basic HTML and CSS within JSP pages for frontend development.
- - Employed MySQL database for data storage.
- - Implemented MVC architecture pattern for code organization and scalability.
- - Added login feature with authentication for enhanced security.
- - Enabled users to write blogs through CRUD operations.
- - Integrated third-party service for Gmail sending functionality.
- - Ensured a seamless user experience by combining industry-standard technologies and practices.

No Broker backend   **GitHub Link**

July 2024 - August 2024

- -Designed a scalable backend using Core Java and Spring Boot, following the MVC architecture for clean code organization.
- -Developed REST APIs for seamless communication between the frontend and backend.
- -Implemented secure user authentication with Spring Security and role-based access control.
- -Built advanced search and filter functionalities for properties, including location-based searches using Google Maps API.
- -Managed data efficiently with a MySQL database, ensuring optimized query performance and indexing.
- -Enabled CRUD operations for property listings and integrated dynamic frontend rendering using JSP pages with HTML and CSS.
- -Created a feature-rich admin dashboard to manage user activity, property listings, and analytics.
- -Combined industry-standard tools and best practices to deliver a seamless and efficient user experience.
