PROFILE

Aspiring Project Management Intern with hands-on experience in Agile methodologies, sprint cycle management, and cross-functional team coordination. Skilled in leading software development projects using tools like Trello, Next.js, React, and Spring Boot. Proven ability to drive value-driven solutions, enhance team productivity, and manage risks through strategic problem-solving and effective stakeholder communication. Eager to apply my technical and organizational skills in a real-world project management role and grow into a future project leader.

PROJECTS

Ruhuna Internship Portal

Developing a web application for third-year undergraduates to manage internship selections. The platform enables lecturers to select students for career fair interviews, streamlining the recruitment process.

Technologies: Next.js, React, Node.js, Spring Boot, MySQL

- Designed a platform to streamline internship selection for third-year undergraduates.
- Enabled lecturers to efficiently select students for career fair interviews.

Hakmana EDM

A standalone desktop application designed to improve the efficiency of managing inventories, employee details, and report generation

Technologies: Java, JavaFX, MySQL, Figma

- Automated the generation of detailed reports for inventory.
- Streamlined workflows by reducing manual processes and improving data retrieval speeds.
- Enhanced user experience with an intuitive JavaFX-based interface and efficient backend operations.

ECO360X

Designed and developed a system for biology students to follow courses and earn certificates. Focused on enhancing learning accessibility, course management, and user experience.

Technologies: Java, JavaFX, MySQL, Figma

- Designed a system for biology students to follow courses and earn certificates.
- Delivered a user-friendly interface and efficient course management features.
