AI Projects

AI-Based Deepfake Detection | Python, AI, Deep Learning

2024-2025

- Developed an **AI-driven deepfake detection system** using **MesoNet**, an advanced **AI model** optimized for identifying fake videos and images.
- Utilized **AI-based convolutional neural networks (CNNs)** to analyze spatial and temporal inconsistencies in manipulated media.

AI-Powered Healthcare Chatbot | Python, AI, Flask, JavaScript

2023

- Built an **AI-enabled healthcare chatbot** for providing instant medical support through **AI-powered natural language processing (NLP)**.
- The **AI chatbot** can answer **AI-driven** health-related queries, perform **AI-based symptom analysis**, schedule appointments, and guide users to medical assistance.
- Integrated **AI APIs** with **Flask**, ensuring seamless communication and dynamic interactions via **JavaScript**.
- Optimized **AI algorithms** to enhance chatbot response accuracy and improve patient engagement through AI-driven automation.

Technical Skills

- **Languages:** Python, SQL.
- **Technologies/Frameworks:** HTML5, CSS3, Pandas, Flask, Bootstrap, Numpy, PowerBI, Matplotlib, Sklearn.
- **Developer Tools:** VS Code, MySQL, Github

Experience

- 3 Months experience as Frontend Developer at PNINFOSYS October 2023- January 2024
Develop a website First Fiddle Home and Contact page
- Currently at Numeric Infotech as Data analyst and Machine Learning Engineer August 2024 - Today

Coding Platforms

- Solved **1200+** Problems on **Hacker Rank**.
