- Dev Tools & Platforms Git & GitHub, Render / Vercel (deployment), VS Code
- Soft Skills : Project Management, Teamwork, Time Management, Self-Learning, Communication

## HOBBIES

- Travelling
- Adventurous
- Art
- Listening to music
- playing badminton
- Building Web Projects using AI Tools

# DIVYA YELMAKANNE

ENGINEERING STUDENT EXPLORING AI

## PROFILE

I am a dedicated and motivated professional with a strong passion for [your field web development. I enjoy solving problems, learning new skills, and working on meaningful projects. With a focus on quality and teamwork, I strive to contribute value wherever I work. I'm always eager to grow, take on new challenges, and make a positive impact.

## PROJECTS

### SentinelCX

- SentinelCX - AI-Powered Sentiment Dashboard
- Built a lightweight, real-time sentiment analysis dashboard for customer support using AI tools. Features include multi-channel emotion detection, agent insights, and live alerts, all powered by Python/React and file-based storage (JSON/SQLite).

### NeuroType-Typing-Test

- Built a Python-based app that detects early signs of Parkinson's disease by analyzing users' typing patterns. Enables passive, 24/7 symptom monitoring with explainable AI (SHAP)

### NextGenEd

- Developed a PHP-based educational platform with interactive courses, mock tests, expert consultations, and smart tools like OCR, PDF conversion, and an in-browser IDE. Built with HTML, CSS, JS, and PHP for seamless local deployment.

### StackSmash

- StackSmash - Full Stack Learning Platform
- Created an interactive learning platform with real-time code execution, voice navigation, gamified progress, and multilingual support. Built using HTML, CSS, JS, Python Flask, and PHP, with modules for frontend/backend lessons, challenges, and certification.

### ShrutiVaani

- Developed a React + Flask web app that enables voice-to-text and text-to-voice translation in 22+ Indian languages, empowering users with hearing and speech impairments. Features include offline functionality, voice navigation, and accessibility-first design.

## CERTIFICATIONS

→ Call2Code - Hakathon

→ CodeStorm2025 - Hakathon

→ HackGenesis2025 - Hakathon

→ HunarIntern - Web Development Virtual Internship

→ SystemTron - Python Programming Virtual Internship

→ Oasis Infobyte - Java Development Virtual Internship

→ Oasis Infobyte - Android Application Development Virtual Internship

→ TechnoHacks EduTech - Web Development Virtual Internship

→ More Virtual Certifications...

## LAUNGUAGES

- Telugu - Native / Fluent
- English - Proficient (Medium of instruction)
- Hindi - Basic (Understandable and conversational)
