Projects

AKmedical - Healthcare Website

- Developed a robust healthcare management system offering a range of services.
- It includes free checkups, 24/7 ambulance services, access to expert doctors, and medical facilities.
- Patients are able to book the scheduled appointment with the selected doctors.
- It has an interactive user interface to improve the user experience of the people.
- **Technologies/Skills:** HTML, CSS, JavaScript, PHP, MySQL

Weather Application

- It is a weather application that provides real-time weather updates and forecasts for locations worldwide.
- Leveraging APIs and data parsing techniques, the application delivers accurate weather information, including temperature, humidity, wind speed, and precipitation forecasts.
- Build an interactive user interface to enhance the user experience using HTML, CSS, JAVASCRIPT.

Mx Player Clone

- Developed a web-based media player clone of MX Player using HTML, CSS, and JavaScript.
- Fullscreen mode and responsive design for various devices and Implemented video playback speed adjustment.
- I have also added some of the shows, movies, songs that I filtered from the original mx player.
- Integrated a modern, user-friendly interface.
