## Java Developer

0849046707 | [Dqhieuse@gmail.com](mailto:Dqhieuse@gmail.com) | <https://github.com/hieudq05> | Ha Noi City

### SUMMARY

Seeking an Intern Backend Java Developer position to develop and enhance my skills in server-side programming, REST API design, and database management using Java Spring Boot. I aim to gain practical experience in a dynamic environment, contribute to real-world projects, and become a proficient Junior Backend Developer within three years.

### EDUCATION

**FPT Polytechnic College** 08/2023 - 08/2025  
GPA: 3.86  
Major: Software Development

### PROJECTS

**E-Commerce System - Apple Shop** 06/2025 - 08/2025

**Role:** FullStack Developer

**Scope:** Personal Project

**Main Responsibilities:**

- Built and developed a RESTful API system using Spring Boot to handle the core business logic of an e-commerce site.
- Designed and implemented the database using SQL Server to manage product, user, and order data.
- Built a responsive and modern user interface (UI) with ReactJS, Tailwind CSS, and ShadCN.
- Developed key features such as product management, shopping cart, checkout process, and promotional campaigns.
- Implemented a secure authentication and authorization system using Spring Boot Security and JSON Web Tokens (JWT).

**Technical Used:**

- Backend:** Spring Boot, Java, SQL Server
- Frontend:** ReactJS, ShadCN, Tailwind CSS
