PROGRAMMER & CYBERSECURITY EXPERTS

# ILIUS SAGAR

## ABOUT ME

Hi, I am a skilled software and application developer with a passion for creating innovative and efficient solutions. With expertise in modern programming languages, frameworks, and development methodologies, he excels at designing, building, and maintaining scalable applications. His keen eye for detail and dedication to high-quality code ensures that every project he undertakes meets client needs and industry standards. Mohammad is constantly learning and evolving with the latest technologies, making him a valuable asset in the ever-changing tech landscape.

## WORK EXPERIENCE

### Arialkha E-commerce Platform    2024 - PRESENT
Senior Software Engineer

As a Senior Software Engineer at Arialkha E-commerce Platform, I lead the design, development, and optimization of scalable e-commerce solutions. My responsibilities include building robust backend systems using Laravel and Mysql, developing secure payment integrations, and managing real-time order processing workflows. I collaborate with cross-functional teams to ensure seamless user experiences, optimize database performance, and implement best practices in software architecture. Additionally, I contribute to innovation by integrating new technologies, automating business processes, and enhancing the platform's security and scalability to support rapid growth in the Bangladeshi Q-commerce and e-commerce sector.

### Insaf Book - Ride Sharing Platfom    2024 - 2024
Senior Software Engineer

As a Senior Software Engineer at Insaf Book, I contributed to building and scaling a next-generation ride-sharing platform. My role focused on developing secure and efficient backend services, integrating GPS and real-time tracking systems, and implementing optimized algorithms for ride matching and fare calculations. I collaborated closely with cross-functional teams to improve user experience, enhance driver–rider communication, and ensure system reliability under high traffic loads. Additionally, I worked on performance optimization, payment gateway integration, and deployment strategies to ensure a seamless and scalable platform for the Bangladeshi ride-sharing ecosystem.

### Sherazi IT    2022 - 2023
Senior Software Developer

As a Senior Software Developer at Sherazi IT, I played a key role in designing, developing, and deploying customized software solutions for diverse clients. My responsibilities included building scalable web applications, integrating third-party APIs, and optimizing database structures for high performance. I collaborated with clients to gather requirements, translated business needs into technical solutions, and ensured timely delivery of projects with clean, maintainable code. Additionally, I mentored junior developers, implemented best practices in software development, and contributed to enhancing system security, usability, and long-term scalability.

### Walton Group    2018 - 2021
Principle officer (IT)

As Principal Officer in the IT Department at Walton Group, I was responsible for overseeing enterprise-level IT infrastructure, system security, and digital transformation initiatives. My role included managing IT operations, implementing ERP solutions, and ensuring seamless integration across business units. I led a team of engineers to maintain high system availability, optimized network performance, and enforced data security protocols. Additionally, I contributed to the company's technology strategy by introducing automation, enhancing IT governance, and supporting innovation to drive operational efficiency at scale.

## EDUCATION

**2014 - 2016**
**STAMFORD UNIVERSITY BANGLADESH**
- MBA

**2007- 2011**
**KABI NAZRUL GOVT. COLLEGE**
- Bachelor of Business Study

## SKILLS

- Laravel
- Python
- Cyber Security
- Web Penetration
- Software Architecture
- git ci/cd operations (devops)
- AWS/Azure/Google Cloud / VPS (UBUNTU)

## LANGUAGES

- English (Fluent)
- Bangla (Fluent)
