SUMMARY

Founder of **AIALCHEMIST**, a student-powered tech movement engineering the future through innovation and community. Built projects like **Veyon** and **Phantom AI** at the intersection of creativity, code, and impact. Author of "**Might Not the First, But Last**" – collection of admirable poetries. CodeChemist and Hackathon Winner. Always building, always creating.

WORK EXPERIENCE

Founder and CEO, AIALCHEMIST

Apr 2025 – Present

- AIALCHEMIST is a dual-purpose initiative functioning as a student-led community and a profit-generating platform focused on delivering educational resources, tech-based solutions, and personalized guidance in AI and career development.
- Combines social impact with entrepreneurship, fostering peer-led growth while generating revenue through workshops, digital products, and strategic collaborations.

Junior Full Stack Developer, Nuvance Technologies

May 2025 – Present

- Led full-stack development for Nuvance Technologies' internal platform, contributing to core architecture, feature development, and deployment using technologies like React, Node.js, and PostgreSQL.
- Collaborated with product and design teams to enhance platform scalability, improve user experience, and integrate APIs that supported real-time data handling and automation.

Leader, Team Vasiliades and Team LogicAstra

Dec 2024 – Present

- Overview: The team aims to ace more and more tech competitions, hackathons and quizzes, etc.
- Led through finding solution, designing, helping in development, building MVP and presenting.
- Participated in more than 25 Hackathons, Meet ups and Competitions and won our very first "Genethon 2024".
