ABOUT ME

I am a responsible, driven person who has a deep love for software programming. With a strong desire to expand my expertise and improve my abilities, I am committed to developing within the field and becoming a proficient practitioner. My passion for learning and taking on new challenges motivates me to produce work of the highest caliber. I'm actively looking for a chance to put my passion to use and advance in a fast-paced, growth-oriented atmosphere.

EDUCATION

Bachelor of Information technology
University of Moratuwa
2024 Reading

Certificate Course in English
Open University of Sri Lanka
2023

Secendory school

Bio system technology stream in
Zahira national college
2020 - 2022

Ordinary Level
Fathima Balika Maha Vidyalaya
2017-2019

PROJECTS

Indoor Stadium Time Allocation System(Mobile App)
Nov 2024- Present

The Indoor Stadium Time Allocation System addresses scheduling conflicts, underutilization of facilities, and user inconvenience by designing a user interface, managing databases, implementing algorithms, handling bookings, and integrating with payment gateways.

To-Do List - Web and Mobile Application
2024

The To-Do List App or website allows users to manage their tasks using HTML, CSS, and JavaScript. Users can input new tasks into a text box and add them to the list by clicking the "Add" button. Each task can be marked as completed or incomplete by clicking on it. Additionally, a close icon is provided to delete individual tasks from the list. This app offers a simple and interactive way to keep track of tasks and manage daily activities.

Weather App - Web and Mobile Applicaton
2024

The project involves developing a weather app using HTML, CSS, and JavaScript. It fetches real-time data from OpenWeatherMap and displays essential weather information for any city. The app includes a search box, improving API integration and front-end web development skills.

Doctor Appointment Booking System - Mobile App
2024

A full-stack application with patient, doctor, and admin roles, enabling secure appointment management, profile updates, and earnings tracking using React, MongoDB, Express, and Node.js.

LANGUAGE

- English - Speaking, Writing and Reading - 95%

- Sinhala - Speaking, Writing and Reading - 90%

- Tamil - Speaking, Writing and Reading 100%

Achievements

Advanced Level - 2022

General Certificate of Education In Advanced Level In Bio Technology Stream as Bio System Technology (C), Science for Technology (C) & Information Communication Technology(S)

Ordinary Level - 2019

General Certificate of Education In Ordinary Level.(Tamil Medium)

Full-Stack Web Development Certification - 2024

Successfully completed a comprehensive course covering front-end and back-end technologies, culminating in a 30-day project. Gained proficiency in developing responsive websites and dynamic web applications.

SKILLS

Programming Languages

Java, C#, JavaScript: Proficient in object-oriented programming and scripting languages, with experience developing applications across multiple platforms. Skilled in designing, debugging, and optimizing code for various purposes.

Database Management

MySQL, Database Normalization: Experienced in relational database management systems (RDBMS), with a focus on efficient data structuring, normalization techniques, query optimization, and ensuring data integrity.

Web Technologies

HTML, CSS: Proficient in building responsive and user-friendly web interfaces. Capable of developing clean, semantic HTML and designing visually appealing, mobile-first layouts with CSS, incorporating modern design principles.

Soft Skills

- **Problem Solving**: Strong analytical skills for diagnosing and resolving complex technical issues, with a structured approach to troubleshooting and optimizing software.

- **Teamwork**: Collaborative mindset, with the ability to work effectively in teams, contribute ideas, and support team members to achieve shared objectives

- **Verbal Communication**: Excellent communication skills, capable of explaining technical concepts clearly to both technical and non-technical audiences.
