

Ignacio Nizetich

Mar Del Plata, Argentina - +54 9 223 4465359- [linkedin.com/in/ignacionizetich](https://www.linkedin.com/in/ignacionizetich)

Currently pursuing a Technical Degree in Programming at the National Technological University (UTN) in Mar del Plata. Focused on Back-End development, with experience in academic projects involving API design and implementation, database management, and server-side logic. Seeking my first real-world experience and the opportunity to grow in a professional environment.

Experience

- **ArCash – Virtual Wallet [2025] – Academic & Personal Project:**
Developed a web application for a virtual wallet using Java + Spring Boot. The project included integration with external APIs and creation of custom APIs, business logic implementation for transaction management, session handling, and security using JWT, as well as applying the MVC (Model-View-Controller) architecture.
Technologies used: Java, Spring Boot, Maven, MySQL, Thymeleaf, HTML, CSS, Git, JWT, REST APIs, AWS, Postman, Jira, JPA, Hibernate.
Agile methodology: Scrum.
 - **Airline Ticketing System [2024] – Academic Project:**
Implemented CRUD operations, collections, JSON, generics, inheritance, and OOP principles for a complete flight ticketing system with preloaded flights and an administrative panel to manage them.
Technologies used: Java, JSON, OOP, Git.
