PROFILE

Frontend Developer with 7+ years of experience delivering robust, user-centric web applications. Skilled in React.js, Vue.js, Next.js, and modern JavaScript/ES6. Adept at translating complex UI/UX into responsive, pixel-perfect solutions and integrating RESTful APIs. Strong track record in frontend architecture, performance optimization, and collaboration within agile teams. Passionate about clean code, design systems, and enhancing user experience through modern web technologies.

CORE SKILLS AND COMPETENCIES

- HTML5 & CSS3, SCSS & SASS
- JavaScript, ES6 & TypeScript
- React.js & Vue.js
- Next.js
- Node.js & Express.js
- Git, Bitbucket & Jira
- API Integration & Development
- Figma to React
- WordPress
- Responsive & Cross-Browser Design
- Frontend and Backend Engineering
- AWS & Cloud Deployment
- Performance Optimization
- Code Refactoring
- UI/UX Design

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Trax Online Pvt Ltd, Karachi, Pakistan

October 2022 – March 2025

- Architected and launched the Apollo Logistics web application using React.js, delivering a modular and scalable frontend architecture.
- Conducted rigorous code reviews on Bitbucket and mentored team members, ensuring adherence to modern JavaScript standards and best practices.
- Collaborated cross-functionally with Product Managers and Engineering leadership to align UI development with evolving business requirements and product strategy.
- Revamped the Goho Rooms platform and resolved critical performance bottlenecks in the Marco Warehouse application built with Vue.js, improving page load speed and user engagement.
- Implemented advanced responsive design systems, ensuring seamless user experiences across desktops, tablets, and mobile devices.
- Documented and standardized reusable React components, enhancing maintainability and reducing development time for future projects.

JavaScript Engineer | Talverse, Karachi, Pakistan

July 2021 – September 2022

- Engineered complex, data-driven UIs with React.js, while integrating backend services via Node.js and MongoDB to support real-time functionality.
- Designed and deployed custom data tables adaptable to all screen sizes, elevating usability for enterprise-level applications.
- Developed dynamic PDF report generation features, streamlining business reporting workflows and improving visual clarity.
- Created a modular ERP frontend from scratch, transforming wireframes into performant React components and optimized state management.
- Integrated RESTful APIs and third-party services to add new business features, enhancing product capabilities.
- Provided ongoing support and enhancements for Najafyia.org, ensuring stability, performance, and security compliance.

Senior Frontend Developer | Bitswits (Pvt) Ltd, Karachi, Pakistan

February 2021 – July 2021

- Translated intricate UI/UX designs from Figma, Adobe XD, PSD, and Zeplin into high-performance, pixel-perfect HTML5 and JavaScript code.
- Integrated rich JavaScript and jQuery plugins to deliver dynamic and interactive user experiences across browsers.
- Optimized legacy projects by refactoring JavaScript and CSS, reducing load times and improving maintainability.
- Implemented cross-browser compatibility solutions, guaranteeing consistent appearance and functionality.
- Collaborated directly with design and QA teams to ensure design fidelity and defect-free deployments.
- Conducted manual and automated testing to ensure accessibility standards and high-quality user experience.

Senior Frontend Developer | Appedology (Pvt) Ltd, Karachi, Pakistan

July 2019 – February 2021

- Built and maintained modern, responsive WordPress and HTML5 websites, enhancing brand visibility and user engagement.
- Automated build processes using Gulp.js, improving deployment efficiency and reducing manual overhead.
- Implemented optimization strategies that decreased website load times and improved Google Lighthouse scores.
- Maintained alignment with brand identity by working closely with designers and project managers.
- Developed reusable frontend components and design patterns, reducing code duplication and improving scalability.
- Updated and enhanced websites based on analytics and stakeholder feedback, prioritizing user-centric design improvements.

FREELANCE EXPERIENCE

Freelance Frontend Developer | Upwork (Remote)

May 2018 – Present

- Build scalable and high-performance applications using the MERN stack and Next.js for international clients across e-commerce and SaaS.
- Transform Figma and custom UI/UX designs into fully responsive, accessible React applications.
- Integrate secure payment gateways, including Stripe, to support seamless online transactions.
- Debug and resolve complex JavaScript and cross-browser compatibility issues to enhance performance and reliability.
- Optimize websites for SEO and Lighthouse scores through semantic HTML, efficient asset management, and code splitting.
- Advise clients on modern frontend best practices, improving maintainability and user experience.

ACHIEVEMENT

- Received two shoutouts at Talverse.

KEY PROJECTS

- Apollo Logistics
 - Najafyia Foundation
- ERP System
 - Marco Warehouse
- Laundry Online Booking
 - Shipments Tracking

PROFESSIONAL DEVELOPMENT

- MERN Stack Development – Axiom Education (2021)
- React.js Modern Full Stack Course (2020)
- AWS, JavaScript & React: Deploy Web Apps on the Cloud – Udemy (2023)

EDUCATION

BS in Computer Engineering	2016
Sir Syed University of Engineering & Technology	Karachi
